Apparent Dielectric Constant ( $K_a$ ) . A typical TDR curve for a clay soil is shown in Fig. 1. It is customary to scale the time axis with  $(c t)/2$  which converts time to a scaled distance ( $L$ ) as shown in Fig. 1. The value of  $K_a$  is controlled by the polarization ability of the soil.  $K_a$  for EM waves is analogous to an elastic modulus for stress waves.
