KeYmaera is a hybrid verification tool for hybrid systems. It supports differential dynamic logic for hybrid programs and combines deductive, real algebraic, and computer algebraic prover technologies for verifying parameterized hybrid systems.

KeYmaera: A Hybrid Theorem Prover for Hybrid Systems

k-means clustering is a method of vector quantization, originally from signal processing, that is popular for cluster analysis in data mining. k-means clustering aims to partition n observations into k clusters in which each observation belongs to the cluster with the nearest mean, serving as a prototype of the cluster. This results in a partitioning of the data space into Voronoi cells.

The 2018 FIFA World Cup was the 21st FIFA World Cup, an international football tournament contested by the men's national teams of the member associations of FIFA once every four years. It took place in Russia from 14 June to 15 July 2018. It was the first World Cup to be held in Eastern Europe, and the 11th time that it had been held in Europe. At an estimated cost of over \$14.2 billion, it ...

Fig. 1 depicts the common phases of a traditional analytics workflow for Big Data. Data from various sources, including databases, streams, marts, and data warehouses, are used to build models. The large volume and different types of the data can demand pre-processing tasks for integrating the data, cleaning it, and filtering it.

On the Internet, where the number of choices is overwhelming, there is need to filter, prioritize and efficiently deliver relevant information in order to alleviate the problem of information overload, which has created a potential problem to many Internet users.

Recommendation systems: Principles, methods and evaluation

Business Process Management (BPM) research resulted in a plethora of methods, techniques, and tools to support the design, enactment, management, and analysis of operational business processes. This survey aims to structure these results and provide an overview of the state-of-the-art in BPM. In BPM the concept of a process model is fundamental.

Image segmentation is one of the most important tasks in medical image analysis and is often the first and the most critical step in many clinical applications. In brain MRI analysis, image segmentation is commonly used for measuring and visualizing the brain's anatomical structures, for analyzing brain changes, for delineating pathological regions, and for surgical planning and image-guided ...

Publications Index BACK ISSUES OF LUTE NEWS . Lute News, the quarterly magazine of the Lute Society was founded in 1986 by Stephen Haynes, with an electronic colour supplement, The Lutezine added by Christopher Goodwin in 2012. The contents of the 126 issues to date run to over 5,500 pages of reading matter and music. Now you can buy back numbers to complete your collection.

The Lute Society: Lute News Back Issues

Issues What is forecast verification? If we take the term forecast to mean a prediction of the future state (of the weather, stock market prices, or whatever), then forecast verification is the process of assessing the quality of a forecast.. The forecast is compared, or verified, against a corresponding observation of what actually occurred, or some good estimate of the true outcome.
