Introduction: Cho-Oyu at 8201 metres/26,906 feet has only recently become a popular mountain to climb. It is now known to be one of the most accessible of the world's fourteen 8,000 metre/26,500 foot mountains. This is because the ascent to the summit plateau is short and direct, with a few small technical sections, less than 6 metres/20 feet high, climbed using fixed lines.
