The human eye is an organ which reacts to light and pressure. As a sense organ, the mammalian eye allows vision. Human eyes help to provide a three dimensional, moving image, normally coloured in daylight. Rod and cone cells in the retina allow conscious light perception and vision including color differentiation and the perception of depth. The human eye can differentiate between about 10 ...

In our modern economy, innovation is prized socially and rewarded financially. But how do you generate good new ideas? How do you tell which ideas are good? And how do you execute to make them real? Wharton professor Adam Grant addresses these questions in *Originals: How Non-Conformists Move the World*. A bestseller like his first book *Give and Take*, *Originals* studies the habits of highly ...

The parable of the blind men and an elephant originated in the ancient Indian subcontinent, from where it has been widely diffused. However the meaning of the popular proverb differs in other countries. It is a story of a group of blind men, who have never come across an elephant before and who learn and conceptualize what the elephant is like by touching it.
