Agent Technology - SlideShare

The field of agent technology emerged out of philosophical considerations about how to reason about courses of action, and human action, in particular. In analytical philosophy there is an area occupied with so-called practical reasoning, in which one studies so-called practical syllogisms, that constitute patterns of inference regarding actions.

a BDI-agent. (based on Michael Bratman's theory of human practical reasoning) From the inputs of its sensors the agent builds a set of beliefs. Beliefs characterize what an agent imagines its environment state to be; Desires describe agents preferences; Intentions characterize the goals or desires the agent has selected to work on.
