## **Advanced Avionics Handbook - Federal Aviation Administration**

Aviation communication is the means by which aircraft crews connect with other aircraft and people on the ground to relay information. Aviation communication is a crucial component pertaining to the successful functionality of aircraft movement both on the ground and in the air. Increased communication reduces the risk of an accident.

## **Aviation communication - Wikipedia**

In aviation, ACARS (/ ˈ ɛ ː a k ˈ ɛ • r z /; an acronym for aircraft communications addressing and reporting system) is a digital datalink system for transmission of short messages between aircraft and ground stations via airband radio or satellite.
