The aircraft design process is the engineering design process by which aircraft are designed. These depend on many factors such as customer and manufacturer demand, safety protocols, physical and economic constraints etc. For some types of aircraft the design process is regulated by national airworthiness authorities.

UPDATED 24 January 2012 What We Need for 21st Century Combat? "The way to build aircraft or anything else worthwhile is to think out quietly every detail, analyze every situation that may possibly occur, and, when you have it all worked out in practical sequence in your mind, raise heaven and earth and never stop until you have produced the thing you have started to make."
