Alkaloid Biology and Metabolism in Plants by George R Waller and Edmund K Nowacki. pp 294. Plenum Press: New York and London. 1978. £14.17 or \$22.50 Waller and Nowacki have synthesized an authoritative discussion of alkaloids under the following chapter headings: 1. Alkaloids in Chemotaxonomic Relationships. ...

Alkaloid Biology and Metabolism in Plants Organic Reaction

Alkaloid biosynthesis, which requires the adaptation of cellular activities to perform specialized metabolism without compromising general homeostasis, is accomplished by restricting product biosynthesis and accumulation to particular cells and to defined times of plant development.

The high content of alkaloids in old leaves suggests a metabolism regulation function similar to growth hormones, although it is also known that plant hormones such as cytokinins were found to stimulate the alkaloid synthesis 346. Moreover, this also suggests that the basic biological function of alkaloids is endogenous.

Alkaloid-containing plants have been used by humans since ancient times for therapeutic and recreational purposes. For example, medicinal plants have been known in the Mesopotamia at least around 2000 BC. The Odyssey of Homer referred to a gift given to Helen by the Egyptian queen, a drug bringing oblivion. It is believed that the gift was an opium-containing drug.
