comparing the experimental results for the pressure distributions. The present tests were conducted at a nominal Mach number of 5.8 in the GALCIT hypersonic wind tunnel, Leg No. 1.

### **AN EXPERIMENTAL INVESTIGATION OF - thesis.library.caltech.edu**

The aim of the experiments has been to determine the mean velocity distribution and rate of growth of the jet. It is found, within the experimental range and accuracy, that the velocity profiles are similar and that the rate of change of velocity and width of the jet can be expressed by simple power-laws.
