Photographic paper is a paper coated with a light-sensitive chemical formula, used for making photographic prints. When photographic paper is exposed to light, it captures a latent image that is then developed to form a visible image; with most papers the image density from exposure can be sufficient to not require further development, aside from fixing and clearing, though latent exposure is ...

The Chung Collection at the University of British Columbia (Note 2) preserves a unique set of lamp chimneys in their original packaging, recovered from the 1910s-1930s cache in Vancouver's former Wing Sang store (Note 2).. It may be the only such set to have survived anywhere in the world. Three suppliers, who seem to have been manufacturers rather than mere wholesalers, are represented.
