Sometimes it requires to auto-populate data on the element based on selection on another element e.g. City names based on a state. You can do this with the only PHP but it required you to submit every time on selection. This solves the problem but it is little frustrating because it submits every ...

This is crazy but I don't know how to do this, and because of how common the words are, it's hard to find what I need on search engines. I'm thinking this should be an easy one to answer. I want a

How to trigger a file download when clicking an HTML

JavaServer Faces (JSF) is a Java specification for building component-based user interfaces for web applications and was formalized as a standard through the Java Community Process being part of the Java Platform, Enterprise Edition. It is also a MVC web framework that simplifies construction of user interfaces (UI) for server-based applications by using reusable UI components in a page.
