Results. Significant differences in health care access between rural and urban areas exist. Reluctance to seek health care in rural areas was based on cultural and financial constraints, often compounded by a scarcity of services, a lack of trained physicians, insufficient public transport, and poor availability of broadband internet services.

Exposing some important barriers to health care access in

ICD purpose and uses. ICD is the foundation for the identification of health trends and statistics globally, and the international standard for reporting diseases and health conditions.
