The abstract factory pattern provides a way to encapsulate a group of individual factories that have a common theme without specifying their concrete classes. In normal usage, the client software creates a concrete implementation of the abstract factory and then uses the generic interface of the factory to create the concrete objects that are part of the theme.

I wrote PDF Document Inspector as a part of developing my shareware application, Cheap Impostor. PDF Document Inspector is a wrapper over the PJX library I used to parse the input documents in Cheap Impostor. I found it invaluable for debugging, and I thought it might be useful to the community at large. Download PDF Inspector [here](#)
