Methodology, theory, paradigm, algorithm, and method. The methodology is the general research strategy that outlines the way in which research is to be undertaken and, among other things, identifies the methods to be used in it. These methods, described in the methodology, define the means or modes of data collection or, sometimes, how a specific result is to be calculated.

Computational detection and understanding of empathy is an important factor in advancing human-computer interaction. Yet to date, textbased empathy prediction has the following major limitations: It underestimates the psychological complexity of the phenomenon, adheres to a weak notion of ground truth where empathic states are ascribed by third parties, and lacks a shared corpus.

A Note on Terminology â€¦ Advocates of free translation have invented several terms to refer to their approach. The term dynamic equivalence was coined by Eugene Nida in an attempt to avoid the negative connotations of the word paraphrase. Later, Nida used the term functional equivalence to avoid the negative connotations which quickly became attached to dynamic equivalence.
